# DJ CONSOLE

## No Hassle, DJ Mixing on your PC

The Hercules DJ Console is a new way to DJ. It's a revolutionary portable DJ controller, multichannel USB audio and MIDI interface for desktop and laptop PCs. There is nothing else like this on the market.

The Hercules DJ Console puts the mix at your fingertips. Just turn up to a party with a laptop over your shoulder, plug the DJ Console in and you're bringing the house down. The Console's controls are rock-solid, and glow in the dark so you won't get caught out. Rip all the tracks you need as MP3s or Wav files and you'll never have to lug a heavy record box around again.

If you're already a champ with the vinyl you'll love how the DJ Console makes your life easier, all your mixing skills transfer. You'll just have more tunes to choose from, searchable on your PC, and you can still scratch, beatmix and correct pitch in real time. Even better, if the party's a bust, zip up your laptop bag and do a runner. If you're new to mixing you'll find the DJ Console is easier to learn and quicker to use than traditional turntables, and you save a fortune on all that rare vinyl you would have had to buy.

The Hercules DJ Console, the ultimate in affordable DJ computer gear.

### All you need to be a DJ!
